Newest addition to our family...

Introducing the next generation of Perma Tank technology and innovation.

NEW PLATINUM SERIES DIAPHRAGM TANKS, simply the best you can buy, with features no other manufacturer can match:

- Larger draw down volumes at no additional cost
- Two-piece design with fewer welds maximizes tank life
- Premium-grade exterior UV protection without a premium price

THE PROTECTOR™ STD is one easy-to-install control for your standard well system all in one box

- No separate pressure switch, gauge, tank tee or protection device is required

THE PROTECTOR™ SPS is an affordable steady pressure (± 5 PSI) control that provides city water pressure from the well water system

- The Protector SPS uses standard pumps and tanks

These new arrivals join the complete Perma Tank® family that include glass-lined tanks which outlast epoxy and fiberglass, galvanized tanks up to 900 gallons and storage tanks as large as 10,000 gallons.

Perma Tank means more choices, new options, all designed to make your job easier and more profitable, and gives your customers superior system performance and reliability.
