## PERMA TANK

## A WORLD OF CHOICES

## Storage Tanks

- Can be used as pump tanks, storage tanks, contact tanks, mixing tanks, any water storage application
- Custom Storage Tanks
- Sizes from 80 to 12,500 Gallons
- ASME Code steel tanks are constructed of Code material
- ASME Code Construction
- All tanks are constructed to the requirements of the ASME Code. These ASME code tanks are available at 125, 150 \& 160 PSI working pressure. Consult factory for ASME code tanks are with greater or lesser working pressures with special configurations, materials and pressures.
- Linings and Coatings
- Each lining and coating has particular capabilities and limitations. Please consult the factory or your local Water
 Systems representative for recommendations on the uses of linings for specific applications. Lined tanks receive one prime coat of paint on external surface. Thorough investigation on the service life of steel tanks with protective coatings or linings has led to the recommendation of the following linings:
- Glass Lined - All internal surfaces exposed to water are glass lined per ASME HLW code procedures.
- Cement Lined - Cement lining consists of a careful hand application of a specially formulated cement over the interior of the vessel. This lining adds a great deal of weight to the tank; however, with proper application very little tank corrosion occurs over a long life.
- Epoxy Lined - The application of specially formulated epoxy makes this lining suitable for cold or hot water storage.
- Cathodic Protection
- Glass lined, cement and epoxy tanks are furnished with anodes designed for maximum protection.
- All tanks will be supplied with the fittings located as indicated on the drawings unless specified otherwise.
- Inspection Openings
- 11 "x 15 " manhole or 4 "x 6 " handhole are available as options on diameters 36 " and below.
- 2 each 2" ASME inspection openings are standard on tanks 36 " diameter and below.
- $12^{\prime \prime} \times 16^{\prime \prime}$ ASME inspection openings are standard on tanks with $42^{\prime \prime}$ diameters and above.
- Optional
- Military specification tanks
- Manholes, handholes, additional openings, lifting lugs, angle legs, ring base and saddles are available at extra cost.

See pages 2 and 3

## - Galvanized Tanks

- Available in vertical models only
- From 12 to 900 gallons
- 75 psi
- 1-Year Warranty

See page 4

## Custom Storage Tanks

## Selection. Superior Features. Custom Options.

## Volume, Dimension and Weight Specifications

## Custom-Line Storage Tanks (20"-96" Dia. Tanks)

NOTE:

1) 54 " Diameter and larger tanks must be ordered with angle legs rather than threaded leg sockets for vertical installations.
2) Specify for horizontal or vertical installation.
3) No leg sockets provided on horizontal tanks

2 each 2" ASME inspection openings are standard on tanks 36 " diameter and below.
12 " $\times 16$ " ASME inspection openings are standard on tanks with 42 " diameters and above

## Optional Vessel Support Construction

ANGILE LEGS

RING BASE

| DIMENSION CHART (INCHES) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TANK DIAMETER | A | B | C | D | E |
